

## DUST OF A WORLD DESTROYED

But words spoken not want to spend his life as bad as... without being paid remain a dream that is the natural course of a life, the future. I think. What is the past must be sealed as past to see the present and the future. Do not ever go out on a Saturday recently. Cafeteria. Hello communist. Not ever exit from the network, we are always on the network. There are traitors of property that is of person. Until will not let me. I am very nirvana cult. We are residents. Evil is a bad disease as heroin and that is so common drugs compared is pure bullshit. We are in a hospital. I have no one to say these things that I take for crazy, whom rebels is eliminated. Do not believe people in all except enters evil in me at least 95 and as we are unique with qualities such as computers or cars. How do you not explode perhaps evil has bought that disgusting. The good buys, we steal your identity to play our business. Turn off the flame, please use that horror. Do not overdo Tell me that my name is Gerard. The exaggeration is the first form of property, quit that framework which is the set of two or more spiral of evil as two or more municipalities where evil people that is death to life which together form a second spiral of souls "birth" as the call which together form a pattern. Scheme ideas death and bad thoughts, but I thought to be destroyed basically helping as shit. Who's regular is accepted. I look at film already seen among others, smoking a cigarette, I see the world that colour on the other hand those who are alive can only died speech is a presence. I think new artists who speak in silence, as the fires burned, say in the desert, the desert is so handy for tax evaders, the fraudsters.

To live we must kill the evil that is not like a cold but is almost the same thing. As yet do not speak of evil, enslaved them what is supposed to be hell for people who are evil. When you discover the fact that is gradually disappearing evils that the state will be terminated. Life for many years has changed and despite their evils it takes on a form, as standard, because the evil is outside of silence that is not able to remain silent when it's time. That's horrible confusion in the world just watching Italy, already looking. Night.

How to distinguish a higher level than low. Of course now we all have a higher education. I do not understand, which is not designed, well not as accessible or not I am reminded that means accepted in our society. In our world the true not only accepted the false value, but so distorted as to seem true that we attacked, birds of prey, all day until the end and then start again. And 'the loop then what other people pass through the newspaper, it is evil in them better, or in the heart of the business in general. Sconvolgente. More shocking as the fact that goes unnoticed in our minds

or better in your jointly. The evil is not normal. A society without evil would be paid at any price. B.

What is personal experience in comparison experience of all lives never existed perhaps heaven is to live together with all people existed, this is my culture. God is in all things is a very expensive. Costa flags demolish all existing state. Do not pull too. D.

The whole experience is traceable to a common place? As if there was a place. There are places that do not exist and are the future. As being the same.

Night: has nothing to do with anything, treated badly, there are girls (H) C cries looks good. Our demons can be assets. You know who these ruined August. There is a well abroad, where there is no evil. That dream of peace both in Italy banned from what is called bureaucracy, the great brand that sucks the blood both known in the rest of the world. The mercy is so great that the money seem unnecessary, seem. People respond if calls alone. You do not know the evils, I do not know how to advise except to denounce what they heard. It 'a horrible situation here in Singapore. Take what is also prohibited. It is never the good that you always evil attacks. So to define what is safe from what is insane.

After C: I, but for you the world is a moment. And 'everything that comes after, not the end but the whole time that elapses before, during and after the action. How many things to explain is evil beats us, as you know there is evil but do not know that there is really evil, that mockery. Or the photo. Pizza. Good. If you are. People do not exist in other words, but there is already dead, that weight. And 'blinded mind that the strong, strong light. The world takes different forms from those calls and I explain what is being at a slower speed.

There is nothing more sliding time. The world is not complete missing anyone, perhaps even too much and you overcome that do not find anything and anyone. There was a mistaken identity but people still not believe the law disappear. Life is the first point of presence in the main law that then remains true despite the poor live. Tomorrow we vote, I relaxation on the Internet and in music, timing perform their milestones is the solution despite the great walls that we build around. Arrisentirci.

I would. Knowing what you do not force them to come. Maybe so but it is too trivial, it seems that those who want to live in good must mad. The denial is not good as the state is called fascism. Perhaps takes considerable time as 50anni disappear altogether until the black stain. But for me there is a lot more below, we must not hide to believe in God, do not make so not die. I disapprove of that culture where everything is, where you have to take out everything for good and for evil, we must as a minimum cut off what is not ours as the garbage and Recycled. The time is like a cube that draws its faces, colors help to understand. And 'everything is not true discussed for the time being because of the scheme that imprisons, as to be united, our common border to border. The well is located on the planet has nothing of dying except for the infamy which then distributes to all goods. The world expects a ransom.

Out. Park, house, friends, bar, loneliness, lack of presence as she is not that you never arrive. Remember, we own all, the world is full. Do not possible to extract the heart. Hello.

You are talking about a world overwhelmed that if anything the opposite is true with some 'courage. They returned once. Now I see only rubble and beautiful and ugly creatures in the disaster. You decide to be born. Here nobody flies over people like other things... is like a flap on the other side you see the truth. And 'as saying. The bet. Look what we have everyone even if no state gave us names. There is nothing higher than you except the good that God is not evil. Falling that's the game. What is prohibited. What no one can say could become the key to discover evil. What can is not lethal. The silence and the stuff that I mean particularly artificial. How to tell the world has arrived and you are there, this is evil, the Mafia to start then the state and how to defeat them. To win we must be warriors and warriors know how to die. That's disgusting, with the money you could buy everything but make everything disappear even addresses, which they say is so good that the world has to be for those who live there that evil must not know anything but evil do not know anything, at least in dep. The evil must be fought instantly without waiting tomorrow as the most cleverly know. I say that good and evil are different people and then there are many differences in good and evil and that you can not even make the main differences, how to find people. My name is. However open a window that's all real. The air that comes with the environment you live is the law that you have in common with that of the state which should be the same thing. We suffer immobility of all this love for the thc when possible. We are all dead is not like all be saved or at least who sells hot water well should not be discovered. The good is always stronger than evil not get confused, unfortunately the evils are thieves and steal identities. It happens as a revenge or rather as a reaction to a then action will be a paradise, for the moment defeat diseases in a body that I would not be telling believed at the time. We have something that is not part of a few but for all and it is the amount you need to play. The insurance, for nothing. We structures us as institutions, servers, sites, all visual. Interested view that is watching. I am synergy but

will be the time to declare and understand. I am in Europe. I have a plan, I see those who are the other beings of good and other things that it is better not to continue to move idiot. Call me if you have news of new changes in the body, but also complaints of things flying. Everyone should have an option to take defence.

. G.

There is nothing impossible possible and the power of a good thing. Once you find a real good leave any state institution and still existing dedicated to what the new institution guarantees. I said we are all institutes, but many institutions are programs from other programmers are much less and are dii. All real mathematical play as a simple mathematical function also. We have never been bad since there is hidden and everything is hidden as if it were not possible that we exist, as there is evil there is a good, simple no. No possibility out, as ugly view life in this way. Freedom after the evil is very, very beautiful as they seem to us that it is expensive, those worms, but you must not always speak for the dregs not give it color. I said, there is a solution to everyone as it stood. All that is needed there, as is funny that way of behaving, not find anything as if it were impossible to achieve. Death is feasible, everything else is included. The status if they already went from one piece. A world which seems telling invented by a scientist, the work lives of all existed, but you produce?. We are a result, you always compare with what others believe, is a result, but beautiful long as what you want to teach school, and yet, laugh, as no one has yet thought of as simple as solution. All hidden underground, but who has brought the worst of living beings, will jump on Earth even to die. A Sinergy well as a producer that is a matter of being of any kind. Unfortunately, in war there are namely the war but math is our lady. Well! Today I was thinking to other things including pipes and networks in the future that directs us towards good even without thinking, as with the autopilot. And yes, I did. The state is not destroyed it can be argued that a state does not protect us from attacks of evil and bring us enormous weights as slaves of the Egyptians. Pay been infamous we are not slaves but of Ra Ra. You have to find someone lower because this function. What do you next year.

Well! You work late tomorrow, I go to bed which is nearby. Good night.

The guy who pulls more? That linear, simple, modern or what it is copied. Here is who pays?. The owner, the domain. The false you know?. No one not, that's what is false, bureaucratic, national, is also dead beautiful. Make hard to swallow.

The truth is deep crosses your whole life is also true that in the end only you that question. The good wins in absolute silence, say that what is the norm but usually

feel a great, great background noise during the day, as voices of hell on earth, evils, I also feel because the x voices. Why lie perhaps move to live, other locations throughout the network but evil, the voices live on the planet to any address. The truth is a dry, perhaps anarchist. Pause. Relax, declared all know everything on the planet is accepted after accepting evil. Have you ever seen an evil, a good do not know what difference there is sure know but will quite likely to spend more. People certainly wrong but you can not expect a company demons, demons holders of all the good in our society where the evil lives means that we would like the 2500 who has all this time to pass closed. It 'a step higher levels of progress over time that living in my body is not acceptable in our world? In my guilt is the only disease of infection. But this is Easter weekend. Here you go forever with recommendations. There Adjust us what is possible. I always do everything we can until the quota is reached. Fresh air, the symptoms here are good. The blood is not a taboo. This keyboard takes all their keys. G. In the silence would be very, very high if so called conscience. CM.

Who cuts the blood choosing evil as straight for a living makes a mistake that will pay for the rest of their lives. Deciding that evil which is impotence, as a party want, is in error. Faith is the evil of fascism. Thinking that things always come back and that the things we always have a return, as people. There is too much of that thing around which can be defined or even fascism stuff, heroin, a system of absolute fascism above our homes and good ideas. Nothing stated as if it were normal. What is the rule, will be returned. It 'like a virus software installed on your system to which no one knows or wants to give an answer, a solution when it is obvious, obsolete. You do not need to go top, no, we can not go at the top of this world without having chosen good and evil. As if to say that everyone knows and no one says. The vomiting. The feelings are the choice. God exists, I have the certainty that the field holy exist. Just Declare evil states to see better is a matter of opinion. Or wait perish with all its equipment. I saw places where everything outside is bad sometimes the inside, the absolute partition to be themselves. Just that you learn to avoid death.

Memoirs of a well in the land of evils. Thinking the destruction of evil is how it happens. Thinking the dissolution of false August glimpse of the truth. Everything is free or at least is cheap. For just does not exist. The ruins are clear dimension of good and certainty of reconstruction. The naturalness, the course, the normality of these periods the certainty of being trapped evil. I see what has happened, what is happening, the actions of persons and their identity. The Earth is an embellishment, a human optional. The Earth is far kilometers from the position that normally deal, as already dead live in our souls away from the body. Everything is designed depending on how we are for what they have done well after all as a society, as heaven and hell to live not disturb the field holy and true. When the distance between soul and body is zero all evils were eliminated and is a real life future. Smoking a cane. Happy Easter.
