

## LUNATICA HISTORY

Believing you wrong and then discover that it is not true is a manoeuvre which had no time ever. The mistake is believing that nell'io leads to dissolution. The truth is a river full is a no source of water. The rot is not a corrosive ignorance a cave. As there is no limit to study, not all there is a limit as life is limited, their lives. This is the truth but we know that what is the truth. Then there are people who are endless and people who ended and others that there are, but who you are. How to tap our feet on the ground and continue to walk without being disturbed? How wrong that is the world we believe to walk free on the ground and perhaps speak, when not arrive on the ground if not in sleep. Since I have people sleeping in this vigil me enough to stop watching that there is nothing ahead of me. We will stop the death and evil. We have banned all to continue a life that does not exist. Dormite in peace here is a war. Maybe not all the good is granted and what kind of life we have. Life is all, I want it all is perhaps suffer. It is not only art that is the mirror trapassa life, and then, and then it is not true that only a few people can have good, we can all be good but it is prohibited. Forgive me maybe your people are not aware of the good. The well is the completion or complement that joins the earthly and material forming the dream realized that the mind is like a line from when it is children, arrives today. The good life is achieved without harm then not so much negative experiences but without the other wrong. By creating an adult sentiment, interior, free. A sincere disconoscenza evil that leads early as possible at the time to live a safe life.

What do you think good. This site does not exist. Games of power applied relentlessly on us. All illegal, but I think basically it's illegal. What do you want to talk about the Christmas holidays, so good, thanks. But the law will come, what people think is false, that the thought is a false, that they think that we really mistakes too, as too do not die with a gun pointed against it. There is no dialogue, no one speaks. Speaking does not mean spilling in to see if it was included, so you not only lose time parlandosi but zittendosi without having a conversation that is the religion of evil and it is difficult to escape. Then what is the time for people who do not have a party, there is one part social communion is a destruction of mental breakdown in spoken and written language. The law is common and appears to be together but prohibited only think of the law as a solution to these problems. Believing that higher minimum exceed dreams serves to free us from evil. Who will stop speaking to tell you that you are clumsy must be very careful not to die. And then, in the end, there is always a war as a resolution. Do not believe to be alone in that a bad experience, the training, that this is the process of the world,

the sewer. There are several floors above before coming here. The world is a continuous rise of removing the lower floors because they do not need more. The fear is ignorance, it is disgusting that the ignorant commands to define what does not go.

Remember the good is invisible evil is all that you see. There are people who see not only what we see, people who are not imagine what you see and say that create but not only is that they can see what we do not see then that is what we should see instead of see.

There is nothing only you. A total war at all, everything. No, you have stolen and the thief is as if there is.

Discover the true values of life. To discover the extent of the problem real, the damage that has always been forbidden knowledge. View is the time notice that more will hit the future of people. Okay, smoking a cigarette.

Follow my makeup looks everything. It is not what you order evil is good. It 'a disgrace. People lose their voice, they become statues. You do not believe in? The sea, the world is a lifesaver.

Just when attacking but over, mah, I think ever, that is until there is evil on the planet hell is open. But tonight I want is peace is peace, think well tomorrow. But peace is my main goal. Via all these problems that keep those in need. I do not think that thought could reach more than the eye sees and above all there is no need to be evil. Just palate with the law governing education, with the slope, there is no defeat is only a bending metal with which we are made. It first thing you must avoid the error. But more than here tonight is almost night. In the hope, we greet, we wish you happy years © 2007 and the scent of freedom that sweetens life beyond malaise. Hello.

I do not see dry that are not people, are ideas. Since no one said anything to anybody to know that the law, only the art but the art is life in "aid" there are many. Not being and you will see that there is the flower that there is rising on the basis of the brain. The brain is prohibited. What can you tell that goes wrong.

.

.

There are people who do not see at all.

Watch that is really as simple will not speak for fear of error, but that error into the horror. How can I live so always doing new things because the old are forgotten or past. Everything that has been done is a reminder of what we are.

And 'true that it would be very difficult but very likely it is difficult but not impossible what you ask.

A good thought is indeed good music change, change that is the disc with music of high artistic source as Astor Piazzola. How it works is that day, the light is compromised to. Discuto prison. People do not speak of evil overcome without even intending to speak, in my opinion is guilty of numerous offenses that you have during the day, we must not forget that we are goods that command us know even if they do not know that they, too , and that those not, but what confusion. How many confusions spend more. Stop beating you speak. Some also ordered ago in the midst of a lot 'of confusion but you can not expect the sunlight always have stabilized if not good, indeed has not done anything. For the more careful you should pursue and follow that the problem is already for several years.

I have seen in a mirror and I was a devil but on the other hand, who lives in Italy not to say that the problem is the same all over the world is normal some pride, sister, to be devils most likely not familiar with the Devil. Nobody lives in the well known if not the devil. That is the people it claims to be bad and treasure it as the best discoveries when it is the worst position that a living man can take. They are at the gates of the explosion, perhaps formats for this, because this bleak place, almost similar to hell, you quit or dead or alive out very easily. What do you think of fumarci if a cigarette fumes. There are games too big around people make bad games for children that is small. Children are thrown into them. And 'why do I talk I see too many errors of various kinds, and I always feel very alone in front of them, but not because I can not but because I think that alone we would be a long time, years when the need is a few months. But what I can I cover myself divided many tasks to be sbrigati by individuals, how to protect themselves from the evil which is certainly a good pressure to escape the evil creating a vacuum essential to enforce the law body. The world of monkeys. G.

The trip that lasts a lifetime. The world is on the contrary, there is always a struggle to put it back in place to live. There is the property are all masters. Throw a nice breath is the most convenient. Life is not a pipe. It is not likely to become a tube. The risk perception is a very strange for me I do not understand what, how and why but that will give us palate. We can not stand by zero and less, if at least according to my calculations, there is more. Then we try and it works.

That fact was that the past is now, the issue has not been resolved as the cream of society and even passed believe is right here where you are now is where are the ugly affair is that the so called life together with this evil and what comes after, not good death. And if life were this situation submission to a parasite, life would not have been reason to be created. Then there are those who see live well and are good as sequins. But certainly there are people who live in well for a short time. To create the good it will take a combination of things that as long as they keep the person is raised by the daily destruction that is designed for everyone. How are sfuggenti people these days. We all goods but without a law established and paid for all the good that at these levels then it is conscience. We can not have a conscience. Then evil is life, life is evil, who can think for himself shelters. What you see is more important than your life. Both the evil they say it's free, but you pay as you say.

It also does not understand how great, succumbs somewhat and it is not possible that this is the case in some way over, somehow always ends. Why is the image and appearance of what appears to reality, because the price is the same and is the death on the real life of the modern annoyance. But if it were only that. The evil are all diseases, and the cost dear to those demons leave a cleaner world.

I have feelings associated with special occasions or times set. For all we can establish myself, I know that at least once a day evil ago as a gathering call, but I think it's the way you keep alive, warm each other. You see, this issue has never been discussed openly or in writing and then nobody can separate the good deeds than bad, the needs and abuse. However faith and time are always useful, if not for us, for whom the world will be better.

Even those problems I encountered. The memory of 80 years. The availability of houses is a key unique to determine today. Our problems are in the past, at least they must check in the years ranging from 50 to 90 to find evil, they are people living, but not present, closed in the past. A very common mistake is confused with evil. The good is much more free travel for hundreds of years and it is very restrictive think just the last 50 years. Carcerati are mali over time and we with them until their end?

From life saves us. I riscontato that the problem is a tragedy that turns into comedy. Who knows evil should not stop but continue, it is written on. Who does not know the offense does not know the damage, but then you have to provide, especially since the problem is large, we see that is very important. Have you ever heard about the world of raising, raising the mali, but raising the body there are other people, is the situation in Italy and abroad similarly. Of course, you know even though I do not think that people know the source of the incident.

A world view totally abandoned to the wind which can be exploited to live better. Curing your view more than anything else is the biggest hint of property we have.

How bad are those scissors.

Depression and other diseases but the real solution is not with the intervention personnel, time frees us, if this is what we want. Evil still live, we guarantee a life of evil, death and without hope that the world is evil, that you fottono also fottendo while, the words are not very garbati but evil itself is a curse not the place control but the revocation of the word and movement that looks so normal that it seems almost not known is that attitude that gives us so much discomfort in people, well! It is precisely the evil that is, or any person who is evil or the spirit of an evil him to another person who is possibly a good thing. But if freedom is not move and speak without that spirit him that not even notice the eyes of others who does not see that is does not want to see. Evil is a normal human being and that is just simply a human being has nothing super, abnormal. It is not normal.

Did not God. It tries to speak and move in a different way and get him all evil, then there are people who can not move as they say, or is that the tonnage it impossible for him to move again in the evil that are continuously affected. Try talking about the flowers.

Shall I wear out. Hello.

I do not believe that the disappointment and loss are great as the victory, even though the stench of evil is still near believe that I am better. I drank a little ', because we are only during holidays, and then between some' end of writing being tired and not understood not for you but for all, will be the beginning of the year with the perspective that I have but I feel very in the future. Good things, good meals, good everything, life always makes what is your take not know that. In misfortune, were good. We feel close but not so much by on about more than the heart is the life that I am at heart.

Hello that life is better. I love you.
