

THE DAY OF RATS AND 'HIS DEATH.

The calm is the virtue of the strong. You have to have calm that does not pass much worse than a drunk after two days. It 'true that there is not nothing ends there's nothing in a vacuum. Not exit from the well if not by that "door" that you can not say that is death. The problem that remains is that you in the meantime.

There is always the one that forbids you to do and not understand and that we can not hope to die and to continue to talk until it can. In the absurd tomorrow in a vacuum outside what might be that it is forbidden not only knows why not to live in the hot (+ hot) continue to suffer or leave or escape or die. The property is no exaggeration. All outside then everyone inside. Respect for the law because it is your and sometimes really is better not to continue that speech - fact and do more. Everything is possible and nothing is feasible. The diseases of the modern age that sometimes I know that someone is studying.

Everything is true what you have repeated the first time expects to happen in the future. Talk to the people of true original image in the photo. Other things past speeches with people who have lived together with me and you in the past. Then out of ideas for what must have been for what seems and the law that governs undisputed for what it is the past to cut those wires that do not serve.

They disappear the evils a day without problems!

The problem with this evening is the space that we can not enlarge no more than two hours. Already that summer is close and warm friend is the good people of honest conduct. Will these years and the time you change the life and always the last to this state that guarantees all your needs. There are areas where your visual conception of life can be very strange.

Do not continue to do that is better than not. The dinosaurs. Where is the peace? Issues that seem too great falsehood. The major problems were not solved? The Sea and Evil. What things and houses. What is included is everything. Already everything is ready, are you that you are alive. You will not remain not stay, I know that still there is that problem that you and forces you but steals the light of day is not you commit errors in the future are you that you must live otherwise you will be dead, already had not explained well . You can not live without explanation in mid on quality of the human being. All the past is already included. Want posters you thinking of people in these past days, closures and doors that never open

and passing, too many difficulties always declare that they are not only your business and sometimes not at all your affairs. Games of power on our skin. What is the goal of your actions. Who really earns. Where are the beads thrown for some time now and lost. If you offend the good things already for many years are lost. The strength of the economy applied to time as a conquest owned by "rats" for power. A robbery of rats of all things worse than this there's nothing. Again with this fact evils that continue indefinitely, what is an evil: a rat. Definition and perception. All evil is over, when speaking of... eo express myself... s and finish in a dead form. Finish and you're not free to you I have done and so that things are standing and not horizontally. If you deal with those people, the find of terra cotta jar. The world is fascist to fight fascism, it was better a gun or a complaint but I pleased I advise them. Just go and talk to "him" with the police or the police with a mandate to go pick is better.

Too much freedom is not free. Too many constraints and lightness by all but the evidence escapes how things always remain the same. The well is not a cathedral has slopes that are not its m... is the rat and the rest is the difference, the bells are views, music is music other items identified in our state that trembles like a leaf because he knows that but what will The Modern Day?

The day of the rat is his death.

You are not bad, you have been closed over evil with all the qualities of good but do not know anything. It was not solved anything and the well not me but people suffering from wars that are even in their small part. Not ends will not close the good we die one at a time and always new people are born for life, at this moment, we are all on earth and nothing will change our purpose, but also perfect our purposes, living life free in the well Dream that today escapes. There is a material part and a spiritual neither can be omitted to live free. Do not believe the people who say that we have already solved. We have a newscast or a manifesto and nothing if you want things over, we genuinely interested. The money and the good. Do not you have removed the well next month we will do from the good is the future you think that someone can remove if you stay alive.

Some things not say.

Today is the day, new, race, I have to go out in five minutes hello. The kidneys I still work and I have so many memories and I live today in remembrance of the past. Speaking of that problem one day as far as today is a distant recurrence. They have cut the present with the past and the future there's that voice that tells you driving out of the reason you and myself at this time. They are gone all the calculations, bases and ipotenuse to make disappear the existence of the property that are then too. We

repeat, and in the common language evil is your neighbour as those three streets below what you need to remove. The conscience. Hail Mary. They did not understand there is evil here is looking the other side here that is good. They wanted to steal everything they told their friends that we have made have taken everything. In reality they are nothing at this time of evening all that had taken, it was dissolved. The well is "further" higher so they say. All I have done this or you will once entered here will be satisfied. Here there is nothing. The well is like when after you have paid and go to buy what you wanted and then is yours. Zombie. Ehm, living dead zombie is not anything all things are affected by the mountain of what you do not know or not you have said. To get where people say tomorrow, there is so far that even in a year you get there. Nobody has ever said such things. Arriving tomorrow where it reaches us in a year is a practice carried out according to rules that if you do not know precisely the day tomorrow will be prohibited. What is prohibited tomorrow will be exactly what needed to breathe tomorrow, see to find some solution here that prohibited things are so many that almost comes from me laugh. We even get to say that you must not talk that is not true that everything is true, you know even a god in an animal monstrous evil. You have to let that pass if they go without him so that means nothing speak.

The usual problems that a day will be solved. Do you not believe that the usual today are resolved and to what age live, you pretend you have the technology today that everything possible. All things have a name that is enough to discover them tomorrow they go to see, many things and many are there and nobody uses them. The problems are the problems remember those things that if we do not solve you eat.

And late already are tired or do not remember. Of already I see very honest solutions to see where to stand today. The evil is a state of transition shorter than the normal life of a human being as we could, remains ill youth burnt, but you how many years you have fifty.

The well not recover a stable nation where "find" to remain. The darkness is still fear, had thought to move it to the day the fact of arrest, days so that the night had prepared, but they do not know those choices day and night. I had thought that you exist somewhere in the past and call. Conscience is a game by adults, dear, you know to exist? My equal, already the subject of the day was the same, do the same or another make to get. Yesterday we suffered a robbery. Nothing, nothing but cabbage will understand and who cares if too many words care "my friends" too many infections to better understand. The death in life, eternal death, death of days that pass if follow the road, the light what, what will still be god and the like. Living outside you say, you say go outside to live in a meadow. You think to be a party and I should make people laugh always the usual history and then

looks forward that basically there is death and retirement is they made you have killed. But.

So you have left and cabbage who deals with these issues even if a lawyer living in the well.

Diseases that you say that now you do not have the will you have to die to make room to come again because winning younger. Fascism but also cheap. And yet in Italy discusses whether it is right "live or die" do you know what I usually open and listening to music CDs that I had heard a few months or a year or two back.

Working is always a good game you know you know. See have already done and now you tell him, see who have not called well have not seen too much "fog" too evil around him and dear. Then we return to us have done then are made and who are good people with the fog around. And what I know that I wanted to tell you not understand the wave of sound without the noise of the road. Not a distributor of where to take the news that thing and would avoid much better to absorb its good and other fantasies evening that spends almost nothing without understanding that road or only those routes where they end up not remain alone. Where will that order must be in place in the bottom of that compartment of the cabinet your first home or second. There are some things to think talk about it.

Of course they have already done but you where you were.

You are the person missing from the photos that have already erased that you'll need to see how this is what's left to live before you shoot and not nothing remains of what you do in the past and you'll see that you stay in better future . It would be better another coffee but I think it is already late and that things are already very confused and not remain that a y entrust the fate of the evening stop just words. Close the nose.

Notes first morning in normal life hides the... m e. When everything and everyone is alive normally. Not friend normalcy. I am, where there will be more. The eye of the evil duplicate other things in a world that unless you read it you notice other side to do what they should do because that is how he is, only that if they are reported. The system that runs those certain things is that there is no doubt but if they take away in order not to make this known to all. I must exit. See you soon.

Not explained, where not to go, you need to know you, know what you should know. What they have stolen. What do you want you will not do. People who Rebels. At what height journeys. Where cut the human person. Environments and places where the serenity and life are the reality. The world is gone, you'll see that he appear more at the bottom of the road. People perverse, perverted murderers of memory. Prisons in prison. The

quality of things, the taste of fruit. Many things and people not used in the right way. Only empty, that flavor is empty. We should find those accounts already "facts". Silence. Watch what people have produced without image. Recover. You can always recover damages but who pays them, it is said that whoever is in contact with those people living in low in reality are the blasphemy that a little touch people who have become sensitive. The law is always right is like nature. Choose a law just told me that that was what I was comfortable in reality the laws are simple and fundamental those I care about. We must do something or you will do something, something you do in the past equally. Those who have not understood send way, it is difficult to see direct route. Things explain themselves.

The term is all I guarantee you, I have ensured that problem is already solved I resolve in the future let you know I have said even those wanted the money! No. has not understood is already solved. Do Something Else exponent.

We need something between a little 'go on vacation for the month of August. I do not believe in the old power all great things from defeat, huge mountains of problem are issues that in future the children will play there but now are things that even the state resolves. Solving a cube of those involved, people do not betray, social problems, the heaviness of the world. Your home address and the street.

... I wish you good summer holidays. Hello Gerard.
